

Faffa Go

SPÉCIFICATION FONCTIONNELLE · VERSION 1.5

Interface Vendeur

Seller interface — final scope

Everything the e-commerce seller sees and does in the Faffa Go platform: access, parcels, failed-delivery verification, chat, cash payments and returns.

How to read this document. Screen names, buttons and statuses are written in French, exactly as the seller will see them in the interface. Explanations are in English. Section 8 records the decisions taken during the design discussion.

SECTION 1

Purpose and core principles

The seller interface is where online sellers create parcels, follow them, act on failed deliveries, talk to the courier about a parcel, and see exactly what money and returns Faffa Go owes them. It is a web application, used on desktop and phone.

Principle	What it means
Accounts are created by Faffa Go.	There is no public sign-up. The admin creates every seller account.
Cash only, delivered by the courier.	Faffa Go prepares each payment; a courier brings the cash with a bon de versement, and the contact person signs it. No bank transfer, no D17, no payout request button.
Same rates for every seller.	Delivery fee, return fee and the 1,000 DT change-client fee are identical for all sellers. Sellers registered with CIN only have a 3% retenue à la source withheld on each payment (see 2.4).
Delivered is not the same as paid.	Each parcel has a delivery status and, once delivered, a separate cash status. The seller always sees both.
Payment is per parcel.	A payment covers a chosen list of parcels. If some cash is still being counted, only those parcels wait; the rest is paid.
A failure is a question, not a return.	A failed delivery goes to À vérifier . It only becomes a return under the rules in section 6.
The seller sees only his own data.	Counts, amounts and lists are always filtered to the seller. Depot-wide figures never appear.
Courier privacy.	The seller only ever sees the courier's first name. No phone number, no photo, no surname.

SECTION 2

Access and account

2.1 Landing page

The public landing page presents the service and has two entry points:

- › **Devenir partenaire** – for new sellers. It opens the Faffa Go contact options: social media (Facebook, Instagram) and phone / WhatsApp. There is no sign-up form.
- › **Se connecter** – for existing sellers. Opens the login page (phone number + password).

Mot de passe oublié – the seller contacts Faffa Go and the admin resets the password. No SMS reset in v1.

2.2 Account creation (by the admin)

The admin creates the account from the back office. The seller only receives a login.

Information	Entered by	Notes
Shop name, product category, store link (Facebook / Instagram / site)	Admin	Store link is optional but useful to check the seller is real.
Contact person: full name, phone	Admin	Phone is the login identifier.
Statut: Patente , Auto-entrepreneur or CIN uniquement	Admin	Decides whether the 3% retenue à la source applies (see 2.4).
Documents: CIN (front and back) always; patente or auto-entrepreneur card when applicable	Admin	Uploaded by the admin. Stored privately, visible to admins only.
Rates	—	Not entered per seller. The same rates apply to everyone and are set once in the admin settings.
Pickup address	Seller	Not asked at creation. Filled by the seller at his first pickup request (see 4.5).

2.3 The contact person

The contact person is the person whose CIN (and patente or auto-entrepreneur card) was submitted. This gives one clear rule: **the courier hands cash and returns only to the contact person**, who signs the bon de versement and the bon de retour. The courier may check the CIN at handover.

2.4 Seller status and the retenue à la source

Statut	Documents	Retenue à la source
Patente	CIN + patente	None
Auto-entrepreneur	CIN + auto-entrepreneur card	None
CIN uniquement	CIN only	3% of each payment, after Faffa Go fees

How it is calculated in a bon de versement:

Line	Example
Total COD of the parcels paid	1 000,000 DT
- Faffa Go fees (delivery, return, change-client)	- 84,000 DT
= Base after fees	916,000 DT
- Retenue à la source 3% (CIN uniquement only)	- 27,480 DT
= Net paid in cash	888,520 DT

Amounts are rounded to the millime. If the seller later provides a patente or auto-entrepreneur card, the admin changes his statut and the retenue stops from the next bon.

A tax, not a Faffa Go fee. The 3% is a retenue à la source: Faffa Go withholds it on behalf of the tax administration and pays it to them. It is shown on its own line, never mixed with Faffa Go fees, and each withholding is backed by a **certificat de retenue à la source** that the seller can download (see 4.11).

2.5 Account states

State	What the seller can do
Actif	Everything in this document.
Suspendu	Set by the admin. The seller can log in and see his parcels, payments and returns, but cannot create parcels or request pickups.

SECTION 3

Navigation

One top bar on desktop, a bottom bar plus menu on phone. The notification bell and the shop name are always visible.

Menu item	Content	Badge
Tableau de bord	Overview of money, parcels and actions to take	—
Colis	Mes colis, Créer un colis, Import CSV, Étiquettes	—
À vérifier	Failed deliveries waiting for the seller's decision	Count
Ramassages	Pickup requests and their history	—
Paielements	À recevoir and bons de versement	New bons
Retours	Returns at the depot and bons de retour	New bons
Notifications (bell)	In-app notifications	Unread count
Profil	Shop, contact person, addresses, rates, password	—

SECTION 4

Features

4.1 Tableau de bord

The first screen after login. It answers three questions: how much am I owed, what needs my attention, and how are my deliveries going.

- › **À recevoir** (hero number): net amount of delivered parcels not yet paid, split into "chez les coursiers" and "au dépôt, prêt à payer".
- › **À traiter**: parcels in À vérifier with the time left before automatic return, bons de versement and bons de retour on their way, returns at the depot. Each links to its screen.
- › **Aujourd'hui**: the seller's parcels by status (créés, ramassés, en livraison, livrés, échecs).
- › **Taux de livraison** over 7 days = livrés ÷ (livrés + retournés) for parcels closed in the period, with a chart showing values and a scale.
- › Quick actions: **Créer un colis**, **Demander un ramassage**.

4.2 Créer un colis

A fast, keyboard-friendly form. After saving, the seller can print the label immediately.

Field	Required	Rule
Nom du destinataire	Yes	
Téléphone	Yes	8 digits, Tunisian format
Téléphone 2	No	8 digits
Gouvernorat / Délégation	Yes	Chosen from a fixed list (delivery zones depend on it)
Adresse	Yes	Free text, with landmark
Description du produit	Yes	What is inside, e.g. "2 bracelets"
Nombre de pièces	Yes	Default 1
Montant COD (DT)	Yes	Three decimals. 0 allowed if already paid
Colis d'échange	No	Toggle. The courier delivers the new item and brings back the old one, which follows the return flow
Ouverture autorisée	No	Toggle. The customer may open the parcel before paying
Note pour le coursier	No	e.g. "sonner deux fois"

4.3 Import CSV

- › **Télécharger le modèle**: a template file with the exact columns.
- › Validation preview before import: each row is **Valide**, **À vérifier** (e.g. délégation not recognised) or **Erreur** (e.g. phone too short), with the reason.
- › Only valid rows are imported. The seller can fix the file and re-upload.
- › After import: print all labels in one batch.

4.4 Étiquettes

Labels are printed by the seller and stuck on each package before pickup. The whole system runs on scanning this label.

- › Formats: thermal 100 × 150 mm, and A4 with 4 labels per sheet for sellers without a thermal printer.
- › Content: barcode + QR, tracking code (FG-XXXXXX), COD amount in large type, recipient name, phone, délégation and address, seller shop name, flags **Échange** and **Ouverture autorisée**.
- › Single or batch printing; reprint anytime.

4.5 Ramassages

- › **Demander un ramassage**: the seller selects the parcels ready (or states how many), chooses a time window, adds a note.
- › **First request only**: the seller fills the pickup address (gouvernorat, délégation, address, landmark). It is saved in the profile and pre-filled next time. The seller can save more than one address.
- › Statuses: **Demandé** > **Planifié** > **Effectué**, or **Annulé**.
- › **Pickup fee**: free from 5 parcels picked up. Below 5 parcels, a fee of **2,000 DT** applies, counted on the parcels actually scanned by the ramasseur and deducted in the next bon de versement. The request screen shows the rule before the seller confirms ("Moins de 5 colis : ramassage à 2,000 DT").
- › At pickup, the courier scans each parcel. The seller sees exactly which parcels were picked up and which were not.

4.6 Modifier / annuler un colis

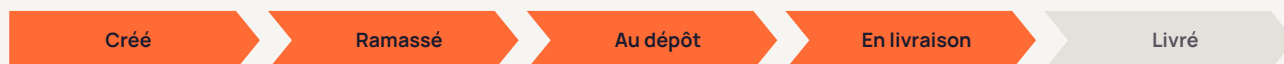

- › **Before pickup**: the seller edits or cancels freely.
- › **After pickup**: no direct edit. The seller requests a change (phone, address) with **Demander une modification**; Faffa Go applies it. A cancellation after pickup follows the return flow and is charged the return fee.

4.7 Mes colis

- › Table: code, recipient, délégation, track line, status, cash status, COD, date.
- › Filters by status group: En cours, Livrés, À vérifier, Payés / Non payés, Retours. Counts are the seller's own.
- › Search by code, name or phone; date range; **Exporter** to CSV.

4.8 Détail du colis

Everything about one parcel on a single screen:

- › Track line and event timeline (who, when, where). No delivery proof photo.
- › Attempts: "Tentative 2 sur 3".
- › Money: COD, delivery fee, net, and cash status (chez le coursier / au dépôt / payé, with the bon de versement number).
- › **Appels Faffa Go**: only the calls made by the Faffa Go customer service, with time and outcome. The seller's own calls are not logged in the platform.
- › **Chat** tab (see 4.10). Courier shown by first name only.
- › Contextual actions: print label, request a change, and the À vérifier actions when relevant.

4.9 À vérifier

When a delivery fails, the parcel is brought back to the depot and gets the status **À vérifier**, always shown with its reason. The seller calls his customer from his own phone, outside the platform, then records his decision.

Reason shown under the status

Only the courier chooses the reason, from a fixed list, when he scans the failure. The seller cannot choose or change it; he sees it read-only, directly under the status, e.g. **À vérifier** · Ne répond pas. The seller's own calls to his customer stay outside the platform.

Reason	Meaning
Ne répond pas	The customer did not answer the courier's calls
Injoignable	Phone switched off or number not reachable
Adresse incorrecte	Address wrong, incomplete or not found
Reporté par le client	The customer asked for another day
Refusé	The customer refused the parcel at the door

Seller decisions

Action	What it does
Relancer	Send the parcel again to the same customer. The seller picks a date / time slot and may correct the phone, address or note. The parcel gets one new attempt; free of charge. If it fails again, it comes back to À vérifier .
Retourner	The parcel becomes a return and is brought back to the seller (see 4.12). The return fee applies.
Changer de client – 1,000 DT	Deliver the parcel to a different customer. The seller enters the new name, phone, address and COD amount (the price may change). The attempt counter restarts at 1. The fee is 1,000 DT for every seller and is deducted in the next bon de versement. Only available once the parcel is back at the depot ; disabled while the courier still has it.

À vérifier starts as soon as the courier scans the failure. Relancer and Retourner can be chosen immediately; Changer de client becomes available when the depot scans the parcel back in (the button shows "Disponible au retour au dépôt").

48-hour rule. If the seller has not decided within 48 hours, the parcel becomes a return automatically. Each row shows the time left before this happens.

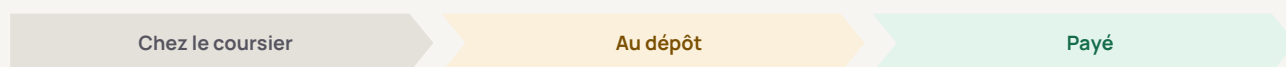

A parcel also becomes a return automatically when the third delivery attempt fails. Faffa Go customer service can call the customer when needed; those calls appear in the parcel under **Appels Faffa Go**.

4.10 Chat du colis

- › One conversation per parcel between the seller and the courier assigned to it, for fast coordination ("le client est disponible après 17h").
- › The courier appears by **first name only**. No phone number or other information.
- › Opens when a courier is assigned; becomes read-only when the parcel is closed (delivered and paid, or return received). If the courier changes, the new courier sees the history.
- › Faffa Go staff can read every chat and join it, for disputes and support.
- › Quick replies for common messages. Text only in v1.

4.11 Paiements

Cash only. Faffa Go prepares the payment and a courier brings the cash to the seller, usually during a pickup visit. The seller never requests a payment; he sees what is coming and signs what he received.

- **À recevoir:** every delivered, unpaid parcel with COD – frais = net and its cash status. Only parcels "au dépôt" can be included in a payment.
- **Bons de versement:** each payment, numbered (BV-2026-0921-01), with date, list of parcels, deductions (delivery fees, return fees, change-client fees, pickup fees, and the 3% retenue à la source for CIN-only sellers, on its own line) and net total.
- **Handover:** the courier gives the cash and the paper bon to the contact person, who counts, signs and keeps his copy. The courier scans the bon's QR code to record the handover. Status: **Préparé** > **En route** > **Remis**.
- **Imprimer:** the seller can print or download any bon from his space.
- **Certificats de retenue à la source** (CIN uniquement only): the seller downloads the certificate for the amounts withheld, per bon and as a yearly summary.
- Partial payment is normal: if some parcels are still being counted, they stay in À recevoir and appear in a later bon. Nothing else is delayed.

4.12 Retours

- **Retour au dépôt:** returns decided (by the seller, the 48-hour rule or the third failed attempt) and waiting to go back.
- **En route:** returns go out with the pickup courier on his next visit to the seller.
- **Reçu:** at handover the courier scans each returned parcel as received, and the contact person signs the **bon de retour** (BR-2026-0921-01). Faffa Go's responsibility for the parcel ends here.
- **Imprimer:** the seller can print or download any bon de retour from his space.
- Old items from **Colis d'échange** follow the same flow.

4.13 Notifications

In the web application only: a bell with an unread count and a list. No SMS, WhatsApp or email.

Event	Notification
Delivery failed	Colis FG-... à vérifier · [motif]
24 h left to decide	Plus que 24 h pour décider sur FG-...
No decision after 48 h	Colis FG-... retourné automatiquement
Parcel becomes a return	Colis FG-... en retour
Bon de versement on its way	Votre paiement BV-... arrive avec le coursier
Bon de retour on its way	Vos retours BR-... arrivent avec le coursier
Pickup planned / done	Ramassage planifié / effectué
New chat message	Nouveau message de [prénom] sur FG-...

Event	Notification
Account notice	Compte suspendu / réactivé

4.14 Profil

- › Shop information and contact person: read-only (changes go through Faffa Go).
- › Statut (Patente, Auto-entrepreneur or CIN uniquement), read-only, with a note when the 3% retenue à la source applies.
- › Pickup addresses: add, edit, choose the default.
- › Rates: delivery fee, return fee, change-client fee (1,000 DT), read-only and the same for every seller.
- › Change password.

SECTION 5

Status reference

These labels are fixed. The interface never uses synonyms.

Delivery status (statut du colis)

Label	Meaning
Créé	Created by the seller, not yet picked up
Ramassé	Scanned by the courier at the seller's place
Au dépôt	Scanned in at the depot
En livraison	Out with a courier
Livré	Delivered, COD collected
À vérifier - motif	Delivery failed, waiting for a decision; shown with its reason
Relancé	Seller chose to resend; waiting for the next tour
Retour au dépôt	Decided as a return, at the depot
Retour en route	Out with the pickup courier, on its way back to the seller
Retour reçu	Scanned as received at handover; bon de retour signed
Annulé	Cancelled by the seller before pickup

Cash status (statut de paiement) — only for delivered parcels

Label	Meaning
Chez le coursier	Collected, the courier still holds the cash
Au dépôt	Counted at the courier's end-of-day reconciliation, ready to pay
Payé	Included in a bon de versement signed by the seller

Other statuses

Object	Statuses
Ramassage	Demandé > Planifié > Effectué · Annulé
Bon de versement	Préparé > En route > Remis (signé)
Bon de retour	Préparé > En route > Remis (signé)
Compte	Actif · Suspendu

SECTION 6

Business rules

- 01 A seller account can only be created by the admin.
- 02 The courier hands cash and returns only to the contact person (the CIN holder), who signs the bon.
- 03 Payments are in cash only, prepared by Faffa Go and delivered by a courier.
- 04 A parcel can be paid only when it is **Livré** and its cash is **Au dépôt**.
- 05 A payment covers a list of parcels. A parcel is either fully paid or not paid; no partial amounts per parcel.
- 06 Rates are the same for every seller. The change-client fee is 1,000 DT.
- 07 Sellers with statut **CIN uniquement** have a 3% retenue à la source, calculated on the amount left after Faffa Go fees, withheld for the tax administration and backed by a certificate.
- 08 Return fees are deducted in the next bon de versement. A cancellation after pickup is charged the return fee.
- 09 Signed paper bons are brought back by the courier and archived at the depot.
- 10 Fees (delivery, return, change-client, pickup) are deducted in the bon de versement, line by line.
- 11 A pickup is free from 5 parcels picked up; below 5, a 2,000 DT pickup fee applies.
- 12 A failed delivery always goes to **À vérifier** first.
- 13 Every parcel in **À vérifier** shows one reason from the fixed list, chosen only by the courier and read-only for the seller.
- 14 The seller can choose **Relancer** (free, one new attempt), **Retourner** or **Changer de client** (1,000 DT, only when the parcel is at the depot).
- 15 Without a decision within 48 hours, the parcel becomes a return automatically.
- 16 Maximum 3 delivery attempts. The third failed attempt makes the parcel a return automatically.
- 17 Returns go back with the pickup courier and are scanned as received at handover.
- 18 The seller sees only calls made by Faffa Go, never a log of his own calls.
- 19 The seller sees only the courier's first name.
- 20 The seller sees only his own parcels, amounts and counts.
- 21 Every status change is recorded with who, when and where, and cannot be edited.

SECTION 7

Out of scope for version 1

Item	Reason
Public sign-up form	Accounts are created by the admin
Delivery proof photo	Not needed for the Tunisian COD market
Call tools or call log for the seller's own calls	Sellers call from their own phone and system
SMS, WhatsApp or email notifications	Notifications are in-app only
Bank transfer, D17 or any non-cash payment	Payments are cash only
Payment requests by the seller	Faffa Go decides when to pay
Per-seller rates	Rates are the same for everyone
Seller choosing or editing the failure reason	Only the courier sets it; the seller sees it
In-app confirmation of bons	Replaced by the signed paper bon and the courier's scan
Several authorised persons per seller	Possible later; v1 uses one contact person
API and Shopify / WooCommerce integration	Planned for a later phase

SECTION 8

Decisions log

Points raised during the design discussion and the decision taken for each.

#	Question	Decision
1	How are return fees charged, given that a return brings in no cash?	Deducted from the next bon de versement as a separate line.
2	Which documents are required to open an account?	CIN always. Statut Patente or Auto-entrepreneur with the matching document; or CIN uniquement with a 3% retenue à la source after Faffa Go fees.
3	For Changer de client: does the attempt counter restart?	Yes, it restarts at 1 for the new customer.
4	For Changer de client: can the COD amount change?	Yes.
5	Is a cancellation after pickup charged?	Yes, the return fee.
6	Where do the signed paper bons go?	The courier brings the signed copy back to the depot, where it is archived.
7	Password reset	Handled by the admin in v1.
8	Who chooses the failure reason?	Only the courier. The seller sees it read-only.
9	Time limit on À vérifier	48 hours, then automatic return.
10	Devenir partenaire	Opens contact options: social media and phone / WhatsApp.
11	Does Relancer cost anything?	No. Relancer is free and gives one new attempt; a new failure returns the parcel to À vérifier.
12	When can Changer de client be used?	Only when the parcel is at the depot, never while the courier has it.
13	Can Faffa Go customer service decide a return?	No. Returns come only from the seller's decision, the 48-hour rule or the 3rd failed attempt.
14	Is a pickup charged?	Free from 5 parcels picked up; 2,000 DT below 5, based on the parcels scanned at pickup.
